連結決算概要 Consolidated Financial Results Summary

Although sales increased in the real estate management segment due to the solid performance of property management commissions and contract work, sales decreased in the real estate development and sales segment, even though contracts for mainstay condominiums sales developed favorably, due to our business plan, which included the completion and handing over of fewer properties than in the same period of the previous fiscal year. Thus, the Group recorded total net sales of ¥129.1 billion, down 17.2% year on year.

Although condominium sales decreased, the profit margin improved, and cost reductions contributed to profitability. As a result, the Group recorded operating income of ¥6.0 billion and ordinary income of ¥4.6 billion. Furthermore, the Group recorded the loss on adjustment for changes of accounting standard for asset retirement obligations which was newly introduced from the first quarter, as an extraordinary loss of ¥0.2 billion. As a result, net income was ¥3.3 billion.

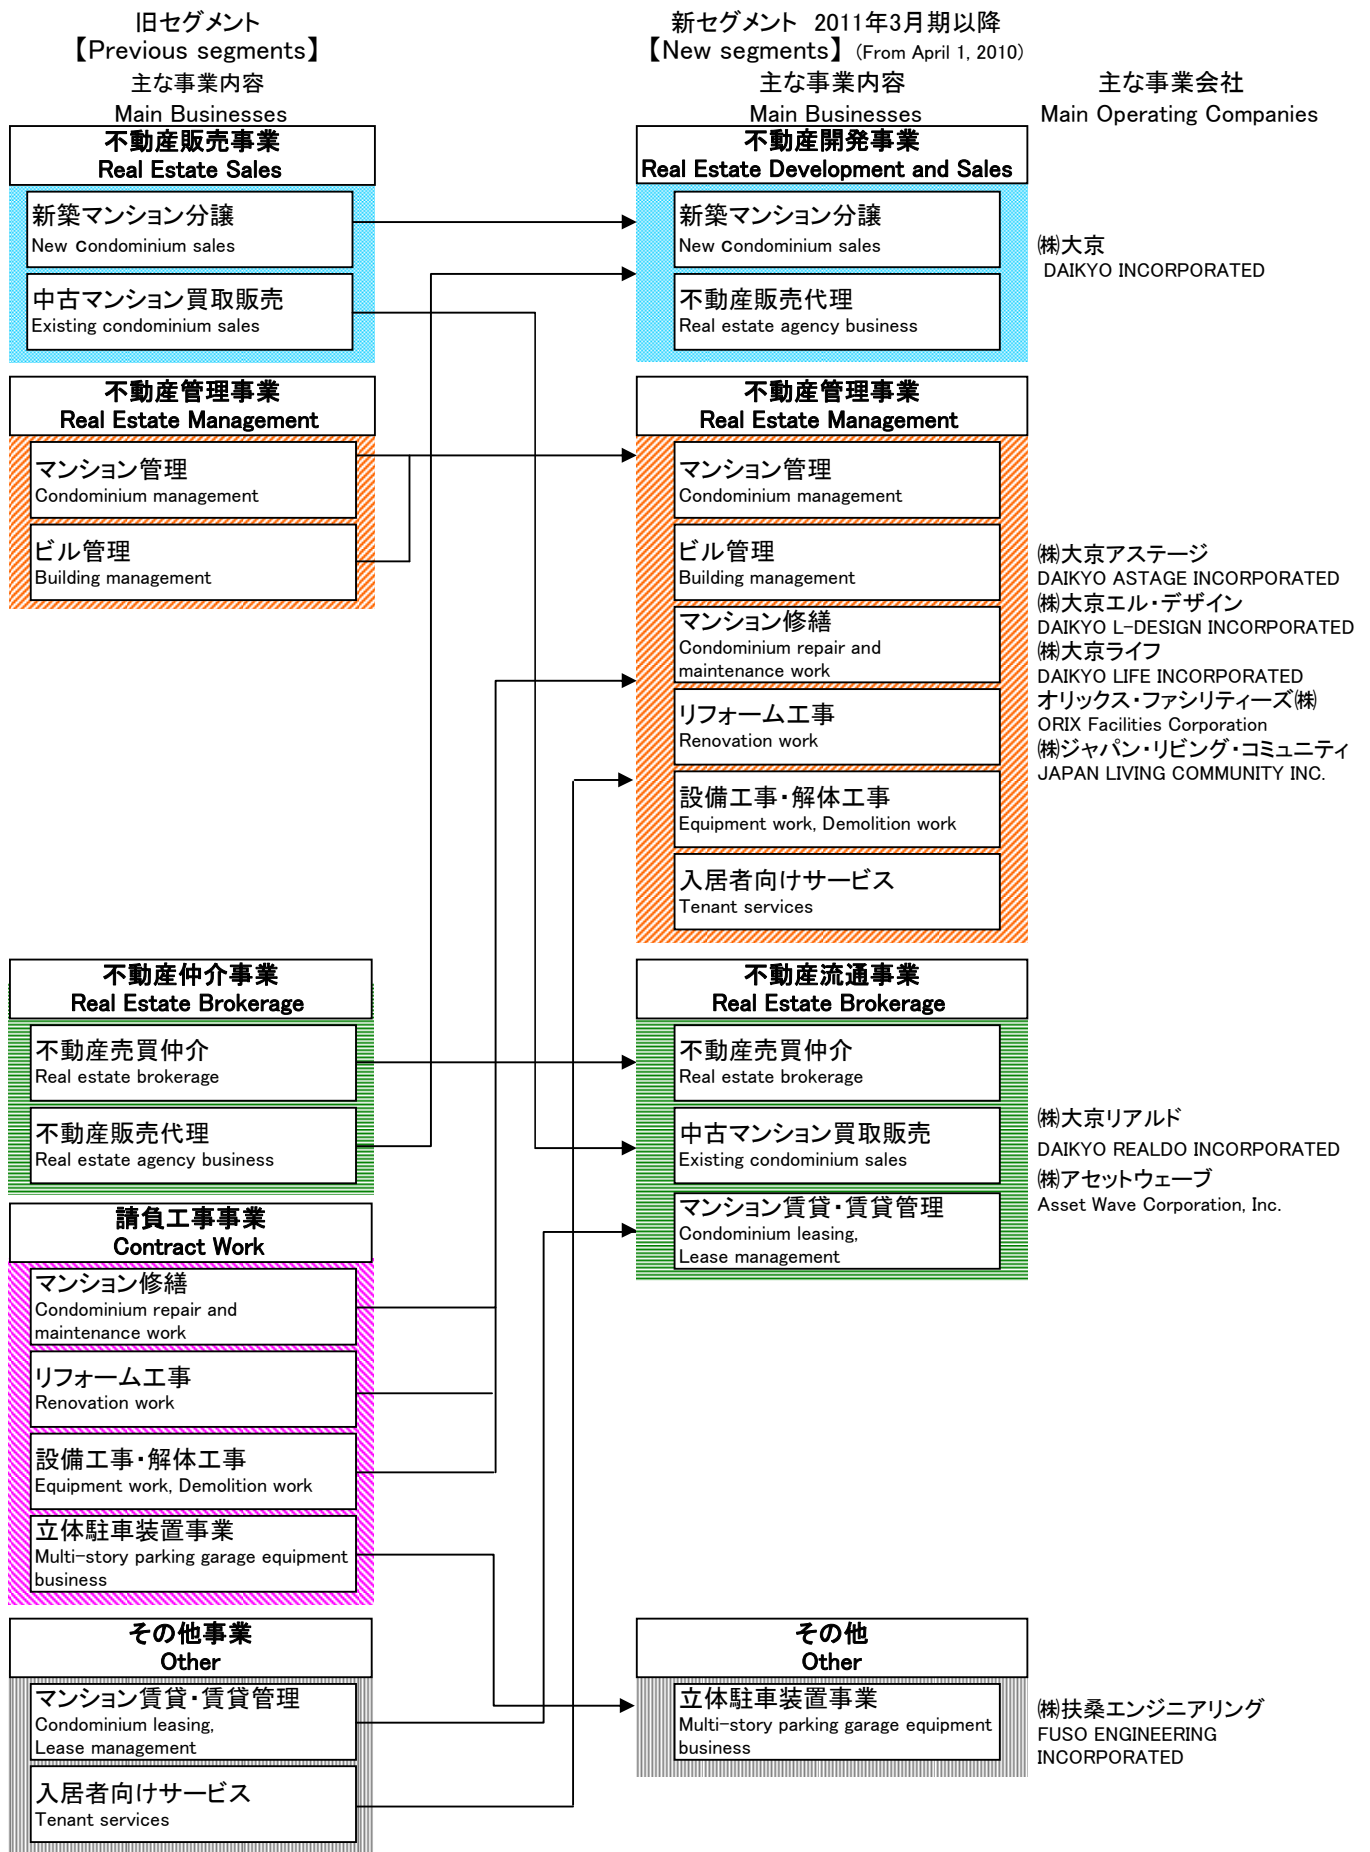

Beginning from the first quarter the Revised Accounting Standard for Disclosures about Segments of an Enterprise and Related Information was applied. Therefore, the Group has changed to business segments with the consolidated companies as the constituent units.

In this segment, net sales were ¥49.8 billion. This was because management income increased due to the higher number of condominiums under management and in addition contract work income increased due to favorable development of large-scale repair and maintenance work on condominiums and an increase in renovation work for residents. While continuing investments to strengthen the Group's business structures for future business expansion, including the personnel structures, the Group recorded ¥3.7 billion in operating income, at the level as planned. The backlog of orders for contract work was ¥14.1 billion, an increase of ¥4.0 billion compared to the end of the previous fiscal year.

連結決算概要 Consolidated Financial Results Summary

Under a severe business environment, net sales in the real estate sales segment sharply declined. However, net sales in both the real estate management segment and the contract work segment increased, reflecting steady progress in efforts to expand and enhance the "Stock" business. As a result, total net sales for the period under review fell 9.5% year on year, to ¥318,356 million.

The Group reported operating income of ¥9,098 million, ordinary income of ¥6,359 million and net income of ¥6,307 million.

These were attributed to income from ORIX Facilities Corporation and J-COMS INCORPORATED*, both of which became consolidated subsidiaries, in addition to contributions resulting from an improvement in gross profit margin and a decrease in selling, general and administrative expenses in the condominium development and sales business in the real estate sales segment.

Total assets decreased by ¥37,064 million from the previous fiscal year-end, to ¥330,456 million yen. Shareholders' equity ratio rose 9.3 percentage points to 26.4%.

*J-COMS INCORPORATED changed its name to the present name, JAPAN LIVING COMMUNITY INC. on April 1, 2010.

Despite an improved gross profit margin in the condominium development and sales business and reduced SG&A expenses, the Group posted an operating loss of ¥2,070 million following revisions to the business plan and construction delays on some projects, along with a write-down of ¥6,710 million for inventory valuations.

The number and amount of contracted sales were 1,853 units and ¥70,498 million, decreases of 128 units and ¥7,670 million compared with the end of the previous fiscal year.

The number and book value of completed condominium units in inventory were 505 units and ¥15,612 million, increases of 126 units and ¥1,957 million compared with the previous fiscal year-end.
